TechToons — User Personas

Market: KE Kenya (East Africa) **Date:** February 23, 2026 **Version:** 1.1

👩‍💻 Grace — The Nairobi Tech-Industry Parent

Age: 32

Role: Software Developer at a Nairobi tech startup

Children: Amani (6) and Jabari (8)

Location: Kilimani, Nairobi

Device: Samsung Galaxy S24, work laptop, shared family tablet

GOALS

- Find screen-time activities that are *actually* educational
- Expose her kids to technology concepts early — especially with CBC's Digital Literacy strand
- Track what her kids are doing on their devices

FRUSTRATIONS

- Most "educational" apps are built for Western audiences and priced in USD
- Feels guilty about screen time; wants to justify it
- Tired of apps that bombard kids with ads or don't accept M-Pesa

HOW TECHTOONS HELPS

- ✅ Coloring is active creation, not passive watching
- ✅ "Did You Know?" facts teach real tech concepts aligned with CBC
- ✅ Parent dashboard shows time spent and learning progress
- ✅ Ad-free, DPA 2019-compliant — no guilt
- ✅ KES 250/mo is affordable; pays via M-Pesa

> *"I want my kids to see technology as something they create, not just consume."*

👧 Wanjiku — The Curious 7-Year-Old

Age: 7

Grade: Grade 2 (CBC)

Interests: Cartoons, space documentaries, drawing, Mum's phone

Device: Shared family Android tablet

GOALS

- Have fun and be creative
- Show off her artwork to Mum, Dad, and Shosh (grandmother)
- Earn rewards and feel accomplished

FRUSTRATIONS

- Gets bored with apps quickly
- Doesn't like apps that are too hard or too "school-like"
- Wants to pick her own colors and do things her way

HOW TECHTOONS HELPS

- ✅ Cool tech illustrations (robots! rockets!) that spark curiosity
- ✅ Easy tap-to-color mechanic — works great on a phone screen too
- ✅ Badges and stickers keep her coming back
- ✅ Export lets her share art on WhatsApp with family

> *"I colored a ROBOT and Mum sent it to Shosh on WhatsApp!"*

👩‍🏫 Mr. Ochieng — The CBC Digital Literacy Teacher

Age: 35

Role: Grade 3 teacher (Digital Literacy & Creative Arts)

School: Moi Primary School, Kisumu County

Class Size: 40 students

Device: School Chromebooks (shared, 3:1 ratio); personal Tecno phone

GOALS

- Find engaging Digital Literacy activities that work on shared Chromebooks
- Align activities with Kenya's CBC framework (Digital Literacy strand)
- Track student engagement without extra marking work

FRUSTRATIONS

- Most EdTech tools are priced for Western schools and require installation
- Pupils are restless during theory lessons; needs hands-on activities
- Limited devices — needs something that works when 3 students share one Chromebook

HOW TECHTOONS HELPS

- ✅ Web-based — works instantly on Chromebooks, no install or download
- ✅ "Assign a page" feature ties coloring to Digital Literacy lesson plans
- ✅ Class dashboard shows who completed what — no marking needed
- ✅ Printable worksheets for device-free sessions
- ✅ KES 500/mo can be funded from per-learner capitation grants

> *"They don't even realize they're learning because they're having so much fun coloring."*

🏠 Aisha — The Mombasa Homeschool Parent

Age: 36

Role: Homeschool parent, part-time Swahili tutor

Children: Fatima (5) and Hassan (9)

Location: Nyali, Mombasa

Device: Infinix Note phone, desktop PC at home

GOALS

- Find CBC-supplementary activities for different age levels
- Keep both kids engaged at the same time (different abilities)
- Document learning progress for homeschool records submitted to Sub-County Education Office

FRUSTRATIONS

- Hard to find single tools that work for both a 5-year-old and a 9-year-old
- Many apps don't provide progress reports needed for homeschool portfolio
- Free apps are full of ads; paid apps priced in USD are too expensive

HOW TECHTOONS HELPS

- ✅ Difficulty levels (Easy → Challenging) work for both Fatima and Hassan
- ✅ Individual child profiles track separate progress
- ✅ Parent dashboard provides exportable reports for homeschool portfolio
- ✅ One KES 250/mo subscription covers the whole family (up to 4 profiles)
- ✅ Works on Infinix phone — no expensive device needed

> *"Finally, one app that works for my kindergartener AND my Grade 4 son — and I can pay with M-Pesa."*
